Capital Markets (Room B)

Capital markets are complex, mediated by computers, fast moving and global. Labour Markets (Room C2)

Robots can offer strong support physically and potentially mentally to our world of work and they do not ask for wages. These update sessions will review ‘-isms’ that are widely worrying but revising their progress can be seen as opportunities for governments and business leaders. We review what impedes progress.

Radicalism (Room B)

Youth unemployment has been a growing global phenomenon for years – adolescents seem very easily persuaded by extremists to be violent against their perceived oppressors. What can be done in the short-term to guard against their anger? And what is the long term solution to tackle terrorism?
