STUDY VISITS

November 15th

1st AXIS | Design the city inspired by the people, their needs and aspirations

Dunar Guincho System - Cresmina Dunes

Space created with the aim of knowing the unique fauna and flora associated with the Guincho-Cresmina dune system. The nucleus serves as a starting point for moments of discovery, since the space takes visitors to explore, through a path of footbridges, the Guincho dunes and their specificities.

TAKE-IT Project - Talent Art creativity Entrepreneurship – Bairro da Torre

Talents and Arts with Creativity and Entrepreneurship, is an innovative response to the problem of deviant behavior carried out by young people living in the territories of the Torre and Galiza.

In the scope of the project the young people are protagonists of the change in their territories, using the urban art as tool of social transformation and of the own neighborhood. Visit to the themed murals of the neighborhood.

Museum Quarter

The Museum Quarter covers a set of cultural facilities and defines a geographical and cultural perimeter, in Cascais. Being a pioneer in our country, the Museum Quarter is distinguished by a strong component of innovation and cultural coherence.

2nd AXIS | coexistence for the feeling of belonging

Car race bearings – Av. Gago Coutinho

The neighborhood is a context of coexistence. Thinking about the languages that promote social coexistence, the Community Playroom of Galiza regularly promotes playstreet activities, such as the Rolling Carts Racing. To think of children who have not yet experienced the sensations of driving a cart, and for adults who yearn to relive this experience, congressmen are invited to participate in a race of rolling carts.

Intergenerational project – Centro Comunitário Sra. Da Boa Nova

It shows a joint dynamic in the area of dramatic expression that involves the senior public and students of the Nossa Senhora da Boa Nova College.

Rugby School Project – Casa Grande da Galiza

The School of Rugby of Galiza was created in September 2006 and is a space for human and sports training for children and adolescents who are "weakened" by lack of family and / or community structure.

It is a project that aims to provide young learners with the possibility of learning and above all playing rugby, without forgetting the leisure component, in a correct technical framework and with an adequate didactic equipment.

3rd AXIS | The city for its people and their life projects

New SBE – - School of business & Economics – Carcavelos

The SBE (School of Business & Economics) project involves the creation of a global management school in Portugal, which combines academic quality with the lifestyle that the country offers.

Taking as a starting point the international recognition that the school has had of its academic quality through the rankings and accreditations and the increase in the demand for international candidates, Nova SBE now intends to take a new step to be able to grow.

Technological Training Pole – Grouping Schools Matilde Rosa Araújo

In S. Domingos de Rana in 2015 the Technological Pole of Formation of the Matilde Rosa Araújo School was created. This pole expanded the educational offer of the professional technical curriculum in the area of Mechanics and Mechatronics Automobile (12th year). As a result of a partnership between the municipality of Cascais, Matilde Rosa Araújo Schools Association and ATEC - Training Academy promoted by Volkswagen Autoeuropa, Siemens, Bosch and the Portuguese-German Chamber of Commerce and Industry, this project has registered interest at the district level, not only by young people but also by the business entities of the sector.

C3 Project - Estoril Congress Center

Project C3 is an operational platform that integrates all the information related to the municipality - from civil protection to mobility - and which will help the autarchy and the security forces to manage their services on a daily basis.

President Carlos Carreiras, on the occasion of the meeting of the Cascais Municipal Safety Council, said that it is a "very powerful tool that uses state-of-the-art technology and will benefit all stakeholders and the whole municipality of Cascais.
